

UW Medicine's Liver Transplant Program provides comprehensive care for patients with liver disease and liver failure, including those who will require organ transplantation. We support patients before, during and after surgery to ensure the best outcome possible.

Renuka Bhattacharya, MD
Chief, Clinical Hepatology, Clinical Associate Professor of Medicine

Specialties: Management of liver transplant patients, treatment of hepatocellular carcinoma, and care of chronic liver diseases including autoimmune and viral hepatitis.
Research interests: Advances in treatment of hepatocellular carcinoma. Recurrence of disease after liver transplantation, including fatty liver disease (NASH) and hepatitis C.

Robert L. Carithers, Jr., MD
Director, Liver Care line, Professor of Medicine

Specialties: Care of patients with hepatitis B, hepatitis C, alcoholic liver disease, autoimmune hepatitis, primary biliary cirrhosis, Wilson disease, liver tumors and liver transplantation.
Research interests: Liver transplantation and the evaluation and management of patients with chronic hepatitis. Emphasis on the design and management of randomized control trials of new treatments for liver disease.

Rex Chang, MD
Assistant Professor of Medicine

Specialties: General and Transplant Hepatology
Research interests: Hepatocellular carcinoma, liver transplantation outcomes, viral hepatitis and non-alcoholic fatty liver disease.

Anne M. Larson, MD
Clinical Professor of Medicine

Specialties: Care of patients with chronic liver disease and cirrhosis, treatment of viral hepatitis, management of hepatocellular carcinoma, and management of liver transplant patients.
Research interests: Treatment of chronic hepatitis C, palliative care in the setting of end-stage liver disease.

Charles Landis, MD, PhD
Assistant Professor of Medicine

Specialties: General and transplant hepatology, general gastroenterology and endoscopy.
Research interests: New therapeutic agents for chronic hepatitis C, Hepatocellular carcinoma.

Iris W. Liou, MD
Clinical Associate Professor of Medicine

Specialties: General and Transplant Hepatology, Gastroenterology.
Research interests: Acute liver failure, acute on chronic liver failure, complications of cirrhosis, clinical outcomes following liver transplantation, hepatocellular carcinoma, and hepatitis B.

Lei Yu, MD
Clinical Assistant of Medicine

Specialties: Gastroenterology and Hepatology.
Research interests: The effect of diet and nutritional modification in chronic liver diseases; the role of bacterial infection in the progression of primary sclerosing cholangitis.

To request a consult or referral please call our Liver Care Referral Line at 206.598.4973

For urgent referrals, please contact the UW Medicine Transfer Center at 206.744.9300 or 888.731.4971

Ramasamy Bakthvatsalam, MBBs, MS, FRCS(G)
Associate Professor, Division of Transplant Surgery

Specialties: Kidney, pancreas and liver transplantation, complex uro-onology and dialysis access.
Research interests: Outcome research in transplantation.

Andre A. S. Dick, MD, MPH
Associate Professor, Division of Transplant Surgery

Specialties: Liver, kidney and pancreas transplantation and pediatric transplantation.
Research interests: Obesity and its affects on transplant outcomes and health care disparities in transplantation.

Martin I. Montenovo, MD
Assistant Professor, Division of Transplant Surgery

Specialties: Abdominal transplant surgeon, living liver transplantation.
Research interests: Identifying genomic patterns of hepatocellular carcinoma that will help predict recurrence following liver transplantation.

Lena Sibulesky, MD
Assistant Professor, Division of Transplant Surgery

Specialties: Abdominal transplant surgeon.
Research interests: Ischemic cholangiopathy and studying mechanism of biliary strictures in donors after cardiac death.

James D. Perkins, MD
UW Professor of Surgery and Vice Chair of the Department of Surgery

Specialties: Liver, kidney and pancreas transplantation and liver cancer.
Research interests: Improving surgical care through the use of evidence-based clinical guidelines and continuous performance measures. Conducting outcomes research in transplantation.

Stephen Rayhill, MD
Professor of Surgery

Specialties: Multi-organ transplantation (kidney, liver, pancreas, and intestine) in adults and in children, living donor surgery, hepatic and biliary surgery, liver cancer, pancreatic surgery, general abdominal surgery, hernia repair and dialysis access.
Research interests: Outcomes research in liver, kidney and pancreas transplantation; hepatitis C, hepatocellular cancer, hepatic steatosis, issues in living related donation and organ allocation.

Jorge D. Reyes, MD
Professor of Surgery and Chief of Transplant

Specialties: Liver transplantation, intestine transplantation and hepatobiliary surgery in adults and children.
Research interests: The study of tolerance in solid organ transplant patients. Ischemia reperfusion of transplanted organs. Intestine transplantation in adults and children.
