

UW Medicine

PREGNANCY CARE

One of the most life-changing events in a woman's life is having a baby. UW Medicine obstetrics provides comprehensive, personalized care to women at every stage of pregnancy, from prenatal to post-delivery care, whether routine or high-risk.

Our Team

UW Medicine Obstetrics is dedicated to the well-being of you and your baby. Our team is highly trained in caring for pregnant women and their newborns and offer a variety of approaches to pregnancy care, including:

- Obstetricians
- Gynecologists
- Maternal-Fetal Medicine Specialists
- Certified Nurse Midwives
- Family Medicine Physicians
- Nurses

The University of Washington Medical Center has been named a "Baby Friendly Hospital."

To provide the most comprehensive care, our team works closely with health professionals in other disciplines to address issues that may complicate pregnancy. These include:

- Cardiologists
- Dentists
- Endocrinologists
- Genetic Counselors
- Hematologists
- Neonatologists
- Nutritionists
- Pediatricians
- Social Workers

UW Medicine obstetrics offers prenatal diagnosis, pre-pregnancy counseling and special programs for pregnant women who may be at high risk due to complicating factors.

- Complex Medical Conditions
- Diabetes
- Hypertension
- Teen pregnancy
- Preterm labor
- Pregnancy with multiples (twins or more)

Medical discovery

In addition to providing outstanding patient care, our obstetrics team is at the forefront of innovative research to improve care and advance scientific knowledge in the prevention and treatment of diseases that affect pregnant women and their newborns. Our Maternal Fetal Medicine specialists are world renowned for their groundbreaking discoveries.

Obstetrics is part of the comprehensive care UW Medicine offers women, including reproductive health, gynecology care, and maternal-infant care.
