WHO WE ARE
Airlift Northwest is the premier air ambulance service in the Pacific Northwest and Southeast Alaska. We are a nonprofit entity of UW Medicine. We’ve been serving communities and saving lives since 1982.

AREA OF OPERATION IN ALASKA*

*Learjet flight times. For Pilatus times, please see our website: airliftnw.org.

OUR FLEET
Pilatus PC-12  Learjet 31A

MULTISTATE OPERATIONS
We fly to destinations in other states, including Montana, Idaho and Washington.

MISSION:
We deliver safe, compassionate and exceptional patient care and critical care transport service.

Request a Flight at:
1.800.426.2430 or 206.329.2569

All aviation services, pilots and mechanics are provided by Air Methods Corporation and Aero Air, LLC • airliftnw.org • camts
3,800+ patients/year.
We Serve 100,000+ patients in our 35-year history.
We've Transported 24/7 365 days/year
We Operate

Each transport is crewed with 2 critical care flight nurses with the highest certification and training.

We're Certified

We Communicate
A call to Airlift Northwest engages professionals with the latest technology to help save lives when timing is critical. Our Communications Center maintains real-time contact with referring agencies, coordinates ground resources, provides receiving facilities with ETA updates, and tracks weather, airspace and traffic conditions.

We Educate
Our nurses teach Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS), Trauma Nurse Core Curriculum (TNCC), and Neonatal Resuscitation Program (NRP), as well as other requested topics.

We Give Peace of Mind
AirCare Membership provides high-quality critical care transport service at an affordable cost, including no out-of-pocket expenses after insurance.

We Care for All Sizes
We provide isolette infant incubators for our smallest patients. We have flown 147 isolettes in the last 9 months. Our brand new Pilatus turboprop aircraft can transport larger patients, up to 450 pounds.

We Are Your Neighbors
We've been serving communities in Southeast Alaska since 1982, helping those at their time of greatest need, and participating regularly in health fairs with blood draws, teaching CPR, how to recognize strokes, and more!
