Neurocritical Care Day $175
This one day educational offering focuses on current topics in the management of the critically ill neuroscience patient. Topics will be of interest to both critical and acute care neuroscience nurses as well as other critical care nurses who care for patients with neurological injury and illness. Presentations will include practical anatomy and physiology and clinical correlation, temperature management in the critically ill neuroscience patient, and cranial imaging.
January 23 (7:30a-4:00p)

Neuro Core $525
A three day course on neuroanatomy, neurological assessment, pathophysiology, and management of common neurological and neurosurgical patient problems. An excellent course for those new to neuroscience patient care or further developing basic skills.
February 3, 5, 13 (7:30a-4:00p)

Neuro Core Lite $175
This one day course is an overview of basic neurologic concepts for nurses working on non-neuroscience patient care areas. Concepts include: anatomy and physiology, neurologic assessment, basic pathophysiology and management of traumatic brain injury, stroke, and spinal cord injury.
February 25 (07:30a-4:00p)

Ortho Core $175
This one-day course will include presentations by an interdisciplinary team of orthopedic healthcare experts including surgeons, anesthesiologists, and practitioners specializing in perioperative pain management. We will examine PeriAnesthesia Enhanced Recovery after Major Spine Surgery (PERMS) as a process for improving pre and post-operative patient care outcomes. This course will explore pain management practices in the orthopedic/poly-trauma patient populations, including multimodal and non-pharmacologic therapies. Incorporating interactive case study review and hands on skill assessment the goal of this course is to reinforce acquired knowledge, promote innovative ideas, and provide evidenced based support for the bedside healthcare clinician.
February 27 (07:30a-4:00p)

UW Regional Sepsis Conference $175/$225
The UW Medicine Regional Sepsis Conference is a one-day conference which will explore the cutting-edge of sepsis care. By examining the recently updated international guidelines of care and science behind these evidence-based recommendations the session will explain the rationale behind the standard of care. Breakout sessions will use expert panels to offer an in depth look at the care of sepsis in the prehospital patient, and the pediatric and geriatric populations. Additional breakout sessions will address how to measure your institution’s success and systems of care which have improved delivery of patient care. Afternoon plenary sessions include challenging case studies of sepsis and innovations in sepsis care.
March 6 (07:30a-4:00p)

Psychiatry Core for Med. Surgical Nursing $175
A one-day course for acute care and ICU nurses to enhance knowledge of psychiatric illnesses, treatments, and therapeutic approaches. Course content includes: common psychiatric diagnoses, behavior management strategies, medications, legal implications, brief bedside interventions, and care plan development.
March 10 (07:30a-4:00p)

Cardiology Core $350
A two-day course focused on the care of patients with cardiac disease. General sessions include the latest in ACS, CHF, trends in resuscitation and more. Break-out sessions include a variety of critical care and acute care topics such as IABP, pacemakers, post-cath care, and I-2 Lead EKG interpretation.
March 23 & 24 (07:30a-4:30p)
$350 for both days or $175 for individual days

Targeted Temperature Management $100
4-hour class focusing on latest research findings on TTM, ICU care and shiver management
April 9 (8a-12p)

Nursing Management of Stroke $175
A one day course focusing on the care of the stroke patient. Content includes: stroke pathophysiology, medical treatments/diagnostics and secondary prevention strategies, as well as educational needs of patients and families, nursing interventions and nursing assessment.
April 14 (7:30a-4:00p)

Advanced ICU Day $175
This one day course is an overview of basic neurologic concepts for nurses working on non-neuroscience patient care areas. Concepts include: anatomy and physiology, neurologic assessment, basic pathophysiology and management of traumatic brain injury, stroke, and spinal cord injury.
April 24 (7:30a-4:30p)

Recognizing & Responding to Urgent Patient Changes in the Acute Care Setting $175
This one-day course will include care of the patient presenting with acute changes in neuro status, chest pain, sepsis, bleeding emergencies, respiratory distress, DKA, and hypoglycemic emergencies. This course includes hands on skills stations and simulation to assist you in caring for the client presenting with deterioration in the acute care setting.
April 28 (07:30a-4:00p)

Infection Control Core $175
Every year 1.7 million infections occur in hospitals across the US, resulting in an estimated 99,000 deaths due to hospital acquired infections. Infection Control is a VITAL part of PATIENT SAFETY! This one-day course includes a potpourri of topics ranging from basic microbiology review to health care worker interventions needed to keep our patients safe.
May 8 (07:00a-3:30p)

Emergency Nurses Association Courses
The following courses are taught using ENA-developed curriculum and text, included in fee. Text is sent 2-3 weeks prior to class.
ENPC (Emergency Nurse Pediatric Course) $350
Accurate assessment of a child with an acute illness or injury requires special knowledge and skills. ENPC gives nurses the tools to provide expert care for patients from birth to adolescence. This course combines interactive learning with scenario-based assessments to give nurses a comprehensive learning experience.
February 19 & 20 OR May 12 & 13 (8:00a-4:30p)

TNCC (Trauma Nursing Core Curriculum) $350
A two-day course meeting WA state trauma designation education requirements. Focus is on initial assessment and stabilization of trauma patients of all ages with multi-system injuries.
January 15 & 16 OR April 21 & 22 (7:15a-4:00p)
Registration: Outreach Education January - May 2015
