|---|------------|-----------|
| 3. Any major restorative treatment needed? | YES | NO |
|---|------------|-----------|
- If yes, what? And when?** _____

Other
4. **comments** _____

General principles for transplant patients:

- 1) Prefer that dental problems be taken care of prior to transplant
- 2) Prefer to delay "routine care" in the first month after transplant. Emergencies and infections should be treated as soon as possible.
- 3) After transplant, patient should receive antibiotic prophylaxis as recommended by the American Heart Association.
