

REFRACTIVE SERVICES

Our Refractive Services

The UW Medicine Eye Institute is committed to provide the best patient care, one patient at a time. We take time with each patient to decide the best surgical or non-surgical options. Our expertise and dedication foster our desire to give compassionate, comprehensive patient care. We know that vision has a profound impact on the quality of people's lives.

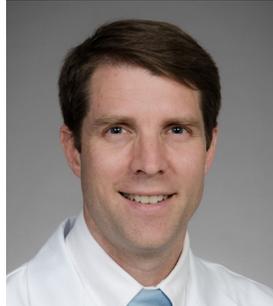

The decision for refractive surgery is highly individualized. Our doctors will describe the different procedures in detail, and work closely with you to develop a personalized plan. Our goal is to minimize your dependence on eyeglasses or contact lenses. If you are considering LASIK, LASEK, PRK, or natural lens replacement, please call us with your questions. Determining whether you are a candidate for refractive surgery is free.

The UW Medicine Eye Institute offers a full range of state-of-the-art vision-correction services, including evaluation and treatment for cataracts.

Michael R. Banitt, M.D.

Dr. Banitt is an ophthalmologist who specializes in refractive eye care with a particular interest in patients with both cornea and glaucoma problems. His goal is to find better surgeries to improve people's sight.

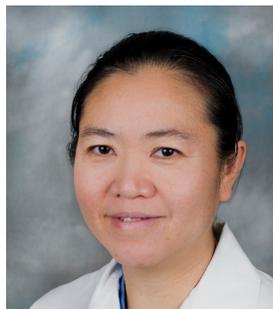

Scope of Care: Dr. Banitt performs cornea, glaucoma, and cataract surgery to improve the vision and quality of life of his patients. Dr. Banitt strives to help the patient make the best medical decision they are able to make with the latest information.

Anne Ko, M.D.

Dr. Ko is an ophthalmologist who provides patients with diagnosis and management of corneal eye conditions. She gives her patients the information they need to make an informed decision about their care.

Scope of Care: Dr. Ko provides comprehensive ophthalmology services, and care for corneal eye conditions including cataracts, dry eye, glaucoma, and ocular surface diseases.

Tueng T. Shen, M.D., Ph. D.

Dr. Shen directs the refractive surgery program and specializes in refractive surgery, cataract and the medical and surgical management of corneal disorders. She established this region's only artificial cornea transplant program to treat severe corneal blindness.

Scope of Care: Dr. Shen performs refractive surgeries (laser and non-laser) to improve the quality and safety of her patients' lives. She strongly believes that every patient deserves a physician who listens carefully and serves as an advocate and partner in vision care.
