

MEET OUR SURGEONS

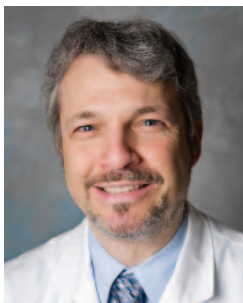

The Otolaryngology service at UW Medical Center provides expert and personal care to every patient we treat. Our physicians and multidisciplinary teams perform diagnostic evaluations to discern the cause and extent of ear, nose and throat problems. We discuss our recommended course of care with patients and deliver appropriate medical and surgical treatment.

AMIT D. BHRANY, M.D.
Assistant Professor
Facial Plastic & Reconstructive Surgery
Head & Neck Surgery

Consider our experience

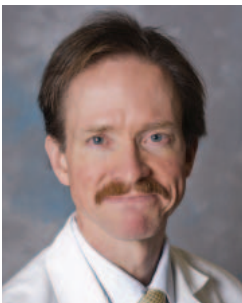

- Our team includes surgeons and practitioners who have built expertise in treating thousands of patients over decades.
- Our surgeons typically perform minimally invasive procedures, which are safer and promote the quickest possible recovery.
- Specialized facilities combined with high volume and the extensive practitioner experience at UWMC supports the best possible patient care outcome and experience.
