SCHEDULE A

Statement of Work

1. Purpose

New Journeys is an evidenced based, multi-disciplinary Coordinated Specialty Care (CSC) model for youth and young adults, ages of 15-40, who are experiencing first episode psychosis (FEP).

Contractor will implement the New Journeys model to fidelity as outlined in the New Journeys Manual. The New Journeys team shall serve no more than 25-30 enrolled individuals at a given time. Services will be provided in home, community, and clinic settings. Enrollees will be eligible for the New Journeys program for a duration of up to 24 months of treatment. The New Journeys site will focus on establishing and building capacity for the assessment, case management, and treatment of youth and young adults experiencing FEP. A primary focus of the program is strategic community outreach and education about FEP as well as targeted program recruitment to decrease Duration of Untreated Psychosis (DUP). The New Journeys contractor will serve individuals with Medicaid coverage as well as non-Medicaid (private insurance and no insurance).

2. Definitions

“Coordinated Specialty Care” or “CSC” means a recovery-oriented treatment program for people with first episode psychosis (FEP). CSC promotes shared decision making and uses a team of specialists who work with the client to create a personal treatment plan. The specialists offer psychotherapy, medication management geared to individuals with FEP, family education and support, case management, and work or education support, depending on the individual’s needs and preferences. The client and the team work together to make treatment decisions, involving family members as much as possible.

“Division of Behavioral Health and Recovery” or “DBHR” means a division of the Health Care Authority (HCA), the HCA-designated state mental health authority to administer the state and Medicaid funded mental health programs authorized by RCW chapters 71.05, 71.24, and 71.34.

“First Episode Psychosis” or “FEP” Refers to **when a person first shows signs of perceptual changes and loss of contact with reality, typically within one week to two years of the onset of changes.** The longer symptoms of psychosis go untreated, the more severe and chronic symptoms become, resulting in decreased functioning and other negative outcomes over the course of their lifetime. The goal of addressing FEP within the first two years of onset is to decrease the duration of untreated psychosis to improve outcomes throughout an individual’s lifetime.

“Mental Health Block Grant” or “MHBG” means those funds granted by the Secretary of the DHHS, through the Center for Mental Health Services (CMHS), Substance Abuse and Mental Health Services Administration (SAMHSA), to states to establish or expand an organized community-based system for providing mental health services for adults with SMI and children with SED. States must submit an application in accordance with the law for applicable fiscal years for which they seek MHBG funds. Awarded MHBG funds must be used to carry out the State plan contained within the application, to evaluate programs and services set in place under the plan,

and to conduct planning, administration, and educational activities related to the provision of services under the plan.

“New Journeys CSC Team” - a full fidelity NJ CSC team serves up to 30 individuals, engages in ongoing NJ training with University of Washington (UW) and Washington State University (WSU), and has submitted a New Journeys Attestation which has been approved by the Health Care Authority.

“New Journey’s Manual” is a manual that provides guidelines to ensure consistency in the goals, principles, and delivery of New Journeys services across Washington State. The HCA Contract Manager will provide this document via email outside of the contract.

“SAMHSA” means U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration.

“Severe Emotional Disturbance/Severe Mental Illness” or “SED/SMI” means children from birth to age 18 (SED) and adults persons age 18 and over (SMI): (1) who currently meets or at any time during the past year has met criteria for a mental disorder – including within developmental and cultural contexts – as specified within a recognized diagnostic classification system (e.g. most recent editions of DSM, ICD, etc.), and (2) who displays functional impairment, as determined by a standardized measure, which impedes progress towards recovery and substantially interferes with or limits the person’s role or functioning in family, school, employment, relationships, or community activities.

“Startup funds” Funding for NJ CSC is provided by HCA directly to the NJ team before the team provides any services. This may include capital and training expenditure funds.

“Supplemental Case Building Funds” Per the fidelity model, new NJ teams are required to “ramp up” their caseloads incrementally over time, as required by legislation and guidelines. A full team takes between 15 and 24 months to reach full capacity. “Case building funds” are loaded into the provider or BH-ASO contracts with DBHR. This funding is intended to supplement the NJ teams during the period teams are working toward a full caseload.

“Team Based Rate” or “TBR” refers to a Medicaid case rate payment that is stratified into two Tiers. The tiers reflect a higher level of service intensity during the first six months of treatment. The case rate payment will be paid to the Managed Care Organizations as a Per User Per Month (PUPM). The fiscal assumptions supporting the PUPM amount fully support the costs of the NJ teams to provide this service to Medicaid enrollees.

3. **Work Expectations.** Contractor will ensure that the New Journeys team facilitates the implementation of the program, providing low-barrier access for individuals experiencing a first episode of psychosis. Teams will screen for eligibility using the following criteria:
